The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to being in the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis). [\[Read about causes and how to protect your dog.\]](#)

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis). [\[Read about causes and how to protect your dog.\]](#)

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis). [\[Read about causes and how to protect your dog.\]](#)

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis). [\[Read about causes and how to protect your dog.\]](#)

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence.

Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).

The Dogs of Hall-O-ween on the Green

Dog owners generally appreciate tricks but Eastham Dog Owners' fended off the tricks in favor of treats for the costumed children attending Hall-O-Ween on the Green.

Tony Cantore, Joanne Baldauf, and Tracey Plantier represented EDOA at the event.

There was a great turnout near the Eastham Town Hall. We actually had to re-fill our supply of dog treats that were handed out in addition to candy for the children. There were lots of children dressed as dogs as Paw Patrol is a very popular children's cartoon, but Tony made sure he was not outdone as he greeted revelers as a GIANT puppy.

Dog Health

Just when a dry Cape Cod Summer had reduced tick infestation, a rainy Fall has switched that all around. Permethrin on clothing is recommended. Prevention is the best protection. Also, as it does take 36—48 hours for a biting tick to transfer the grizzly menu of maladies to you or your dog, careful inspection and removal is an effective regimen.

We are getting warned that leptospirosis is also making a resurgence. Tufts University Cummings School of Medicine is seeing a marked increase of severe leptospirosis cases this year. Many of the cases have multiple organ involvement requiring intensive care and treatment (e.g. dialysis).
