

Dangerous Dog Hearing Postponed

A Select Board agenda item scheduled for Monday 3/25/24 has been postponed at the request of the dog owner's lawyer.

The hearing was prompted by action of the Animal Control Officer, Stephanie Sykes against 2 Siberian Huskies owned by Richard Moore of 20 Boreen Rd, Eastham.

It is always sad to be faced with the injury of animals and people, and that includes the aggressive dogs. Unfortunately there is a long list of complaints alleging the dogs engaged in multiple escapes, killing of chickens, biting a horse, and biting humans.

The incidents and possible remediation being considered by the Select Board are posted in the [Town of Eastham agenda packet](#).

No date for a rescheduling of the hearing is currently available.

EDOA Events 2024

Rabies Clinic	April 21 st
Recall Training	April 25 th
Candidates Night	May 13 th
Bow Wow Bash (spring)	May 18 th
Hands on the Arts	June 22 nd & 23 rd
Windmill Weekend Booth	Sept 7 th
Windmill Weekend Parade	Sept 8 th

Annual Meeting	October 17 th
Turnip Fest	November 23 rd ?

Can you help with the Bash?

Coordinator Bev Hobbs is looking for volunteers to help out with the Spring Bow Wow Bash.

We could use:

- grill master
- hot dog distributor
- parking director
- assistance with merch
- ice cream distribution specialist

If you want to join team Bash, contact us at info@easthamdog.org

Off-Leash Dog Walking – Best Practices

Part 2 of a series by Edward Daniels, EDOA Director, Public Relations

*This is a series about having a dog trained to be walked off-leash. In Part 1, the happiness of a dog having the **freedom** to spend some time in the 'doggie world' was discussed. Now another advantage.*

Safety

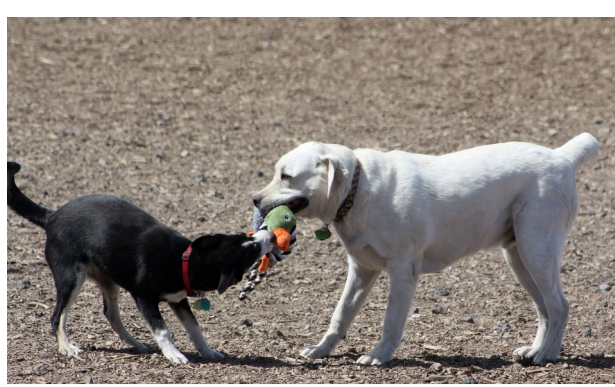

It is typical for dogs to form "family" packs. Domestication has dictated that this behavior be extended to humans. For many dogs, the instinct is to protect the pack, especially a threatened leader, from all intruders. It is only a bit of a stretch to think that a human who needs to keep the dog close – like on a leash - has given that job to the dog at the other end.

Dogs on a leash have a propensity for protective behavior. That is often eased when a dog is off-leash. Time and again we see leashed dogs actively and fearfully showing aggression toward other dogs and people that goes away when off-leash. Sometimes it happens on the spot. One possible line of thought is that the dog does not feel trapped by the leash and therefore knows that it can retreat from a real threat. Leashed, that dog may revert to the default behavior of warding off all potential threats.

Dogs are really good at communicating with each other. They send signals of fear, anxiety, curiosity, playfulness, and friendship. A dog off-leash is safer because it is less anxious, less defensive, less likely to get in a fight. This is especially so when they do not feel they need to be a "protector". Dogs are better able to communicate, retreat, and assess a situation when off-leash.

It is certainly not for every dog or every owner and off-leash requires consistent training, but for those willing and able, you increase the odds of having a happier, safer dog.
